SUMMARY

I am a passionate MERN Stack Enthusiast with 1.5 years of hands-on experience in developing dynamic web applications using React.js and various front-end technologies. My journey includes not only the creation of user-centric interfaces but also a commitment to continuous learning and adapting to new challenges in software development. I excel in collaboration with teams to deliver optimal solutions

EXPERIENCE

Frontend Developer

Mito infotech

📅 01/2024 - Present 📍 Noida, Uttar Pradesh, India

Software development and IT services company

- Developed web applications using React.js, focusing on UI components, user authentication flows, and complex form handling
- Implemented responsive designs and client-side validation for seamless user interactions
- Collaborated with product managers and designers, contributing to code reviews and feedback
- Continuously updated skills and knowledge of front-end technologies to deliver modern solutions

PROJECT

Smart Bill

- Built a responsive and interactive UI using React.js with reusable components for invoice generation, itemized billing, and real-time updates.
- Developed RESTful APIs using Node.js and Express to handle CRUD operations for bills, customers, and product data.
- Integrated MongoDB for storing billing records, enabling secure, scalable, and persistent data management.
- Implemented user authentication with JWT (JSON Web Tokens) for secure login and protected routes.
- Improved performance and usability by using React Hooks, context API, and form validations to ensure a smooth billing experience.

Febrico

Built Febrico, a full-stack e-commerce website using the MERN Stack (MongoDB, Express.js, React, Node.js).

- Integrated Razorpay payment gateway for secure and seamless online transactions.
- Implemented user authentication, product management, cart, and checkout features.
- Designed responsive UI with React and Tailwind CSS for a smooth user experience across devices.
- Used Redux Toolkit for efficient state management and real-time data updates.

VidFlix (VideoStream Learning Project)

A video streaming project built with React JS, Redux, and Tailwind CSS.

- Integrated the YouTube Data API to fetch video content, including search functionality and personalized recommendations
- Implemented Redux Toolkit for efficient state management, optimizing data fetching and improving application performance
- Utilized React Router for seamless and dynamic client-side navigation within the application

FreshMart (Learning Project)

Responsive e-commerce website built using HTML, CSS, Bootstrap, and JavaScript

- Developed a responsive fruit e-commerce website using HTML, CSS, JavaScript, and Bootstrap for an engaging user experience
- Implemented dynamic UI components with Bootstrap and JavaScript, enhancing interactivity
- Integrated user-friendly navigation and product displays, improving accessibility and ease of use.

KEY ACHIEVEMENTS

Coding Achievements

Solved 300+ DSA questions on coding platforms such as GeeksforGeeks, LeetCode, and Coding Ninjas, along with 190 questions on CodeChef, demonstrating proficiency in Java and SQL on HackerRank

Improved Application Speed

Increased web app responsiveness by 30% with React.js.

Enhanced Code Quality

Reduced bug reports by 40% within six months.

User Engagement Growth

Boosted user engagement by 50% through design updates.

EDUCATION

Bachelor of Computer Application (BCA)

Jiwaji University

📅 2021 - 2024 📍 Gwalior (M.P)

12th

Govt. Gorkhi H.S. School

📅 2020 - 2021 📍 Gwalior (M.P)

10th

Govt. Gorkhi H.S. School

📅 2018 - 2019 📍 Gwalior (M.P)

SKILLS

React.js	Redux Toolkit	React Router		
JSON	JavaScript	Tailwind CSS		
Bootstrap	CSS	HTML	Git	Github
Vite	MYSQL	Java		
Data Structure & Algorithm			VS Code	

COURSES

MERN Stack Developer

Completed a MERN Stack frontend development course at Coding Thinker focusing on React-based web applications.

Built responsive and interactive UIs using HTML, CSS, JavaScript, React and Bootstrap.

Integrated Youtube Data API to implement search functionality and personalized recommendations.

Utilized Redux Toolkit for efficient state management and optimized data fetching.

Implemented React Router for dynamic client-side routing and seamless navigation.
